- A full understanding of how to use WordPress and common plugins and with experience in custom WordPress themes.
- Excellent IT skills with knowledge on how to use Adobe Suit software for design purposes.
- Great interpersonal skills.
- Basic understanding of SEO.
- The ability to stay calm in high pressure environments.
- A passion and drive to learn and develop my skills further.

EDUCATION & QUALIFICATIONS

Winchester University – Film Production

I attended university for 1 year doing film production, before I realised my true passion was in web development. Once dropping out, I spent the year learning a range of language and making a small range of web apps for experience, as well as making a couple of websites for clients.

Thorpe St Andrew School & Sixth Form

Sixth Form:

BTEC Business Extended Diploma	Distinction*Distinction*Distinction*
--------------------------------	--------------------------------------

High School:

Additional Science	B	English Language	C	Art & Design - Graphic	C
Mathematics	B	Resistant Materials	D		
English Literature	B	BTEC Engineering	PP		

PREVIOUS WORK

McDonalds (2 Years)

This job taught me a lot when it came to customer experience and working in a large team to achieve a common goal. It also taught me responsibility and punctuality, as I was one of a small team of 5 at 6am every morning who were responsible for making sure the store prepared for the day.

BT Open Reach (1 Week – Work Experience Placement)

For this week I was a tag a long for one of the technicians for BT Open Reach. In this time, I was taught a lot about how the infrastructure that keeps our internet running works, along with how to diagnose the customers problems with their internet and apply that knowledge to find a solution.

HOBBIES & INTERESTS

In my spare time - when I'm not out with friends or family, I enjoy working on several projects to help build my knowledge in web development. My current being a new fitness site that uses the Fitbit API to display your recent data. It also allows you to create a plan, track your progress and follow programs.

When it comes to less tech-based hobbies I currently really enjoy going rock climbing which is a new hobby of mine, as well as working out at the gym. I also love my classic cars (Ford Capri is my dream car) and I currently own a Mk1 Golf with my father.

NOTE

My best display of my experience and knowledge in Vue.js is my Fitness Site that I am developing. It currently is not live on my portfolio, but you can find it here: <https://dev.williamyallop.com>.

There is a demo account set up for it which you can log in with the following details:
